

DEVICE RESTRICTION LIST

11204-A

Applicable Restriction	Samsung (Knox Guard)	Motorola (Motosafe)	Honor/Hisense/Stylo (DPC)
Mandatory connectivity (IOB)	Not restricted	Not restricted	Restricted
Date & Time Change	Not restricted	Restricted	Restricted
Device multi-user / multi space Android supports multiple users on a single Android device by separating user accounts and application data. For instance, parents may allow their children to use the family tablet, a family can share an automobile, or a critical response team might share a mobile device for on-call duty.	Restricted	Restricted	Restricted
Installation of Device Owner Apps/Services Device Owner mode is specifically designed for enterprise or education settings where many devices must be managed centrally. When a device is set up as a device owner, it means that the organization has full control over the device and can enforce policies, install and remove apps, and configure settings remotely.	Restricted	Restricted	Restricted
Google Family Link: The Google Service Family Link is setup on the device. When this service is setup, it will force the device to factory reset (as it conflicts with the Motosafe service).	Not restricted	Restricted	Not restricted
Work Profile: A Work Profile is set on the device when managed by an Enterprise. This is typically done using EMM/MDM solutions. If an EMM/MDM solution is installed on the device, the device will be forced to factory reset (as it conflicts with the Motosafe service).	Not restricted	Restricted	Not restricted

NOTE: Locking software will be removed should you select the 1st option to purchase the device at the end of the rental period at its fair market value.
